

SPECIAL PRODUCTS **ADCON BETONLÖSER UNI**

Ready-to-use, acid-based cleaner for mortar and cement residue removal

APPLICATION:

- » Precast plants
- » Ready-mix concrete plants
- » Concrete processing tools

ADVANTAGES:

- » Strong dissolving effect
- » Removes limescale and cement residue
- » Low consumption and easy processing

PRODUCT DESCRIPTION

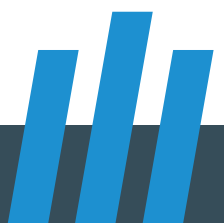

3CS® AdCon BETONLÖSER UNI is a ready-to-use mortar and cement remover for the concrete processing industry. **3CS® AdCon BETONLÖSER UNI** is used to maintain and protect concrete production equipment, tools and construction vehicles. To achieve optimum cleaning effect, prepare an immersion bath with a 1:5 dilution with water. After the immersion bath, rinse the equipment and tools with clear water and leave to dry.

PROCESSING

Apply **3CS® AdCon BETONLÖSER UNI** undiluted (or diluted 1:5 with water for less cleaning effect) evenly using a suitable sprayer or brush. After a reaction time (depending on the degree of contamination), clean the tools and equipment with clear water to neutralize the acid. Slight differences in the product color are possible due to the batch production, but have no influence on the product performance or on the concrete surface.

ADVANTAGES

3CS® AdCon CONCRETE SOLVENT UNI is user-friendly and easy to apply. Thanks to the powerful dissolving effect, **3CS® AdCon BETONLÖSER UNI** effortlessly removes concrete and mortar residues. Construction vehicles and machinery remain clean and well maintained for an extended time.

STORAGE CONDITIONS

Storable for at least 12 months in the original sealed container at temperatures from +5°C to +30°C. Store in a dry place and protect from direct sunlight, frost and contamination. Homogenize before use.

SAFETY INSTRUCTIONS

Please observe the hazard warnings and safety advice on the labels and in the safety data sheets. Important note! Wear personal protective equipment during processing (rubber protective gloves, safety goggles, ...)
